

# SCALA MEDIA PLAYER GUIDE

## GETTING STARTED

Welcome and thank you for choosing a **Scala Media Player** for your digital signage application.

Full setup instructions are in the Scala Media Player Setup Guide available at <https://docs.scala.com/display/SMPG>. Click on the Scala Media Player Setup Guide link for your model.

To proceed with the media player configuration, you will need the account and password credentials given below.

## CONFIGURATION CREDENTIALS

The following default user credentials are provided so you can log in to configure the Scala Media Player for deployment.

ACCOUNT	USERNAME	PASSWORD
Configure Player account (Windows)	scala	scala123#
Configure Player account (Linux)	config	scala123#
Scala Player account	player	scala123#
VNC connection*		test123#

\*For the Linux player, VNC sessions must be tunneled within SSH. See [docs.scala.com](https://docs.scala.com) for more information.

Proper security practice requires that you change these to strong passwords before deploying. For instructions on how to do this, please refer to the Scala Media Player Setup Guide available at <https://docs.scala.com/display/SMPG>

## REFERENCE DOCUMENTS

In addition, the following information is available online at <https://docs.scala.com/display/SMPG>

- What's in the Box
- Media Player Hardware Specifications
- License Compatibility Chart
- Warranty and Support Information
